

Bull Trout -- Coastal-Puget Sound Distinct Population Segment Draft Recovery Plan

[Volume I covers the Puget Sound Management Unit](#) [410 pages]

[Volume II covers the Olympic Peninsula Management Unit](#) [297 pages]

[Note: To open either volume, please click on the name above. Both documents are long so please be patient as it downloads.]

At the scale of the Coastal-Puget Sound Distinct Population Segment, bull trout are broadly distributed, use a variety of habitats, and are affected by a wide array of factors. In order to account for these differences and allow recovery actions to be tailored to specific areas or threats, as well as to encourage the implementation of recovery actions by local interests, we have subdivided the population segment into two separate management units, the Puget Sound

and the Olympic Peninsula. Individual draft recovery plans have been prepared for each of these management units. [Volume I of the Draft Recovery Plan for the Coastal-Puget Sound Distinct Population Segment of Bull Trout covers the Puget Sound Management Unit](#), addressing bull trout populations in all watersheds within the Puget Sound basin north of the Columbia River in Washington and the marine nearshore areas of Puget Sound; it also includes the Chilliwack River and associated tributaries flowing into British Columbia, Canada. [Volume II covers the Olympic Peninsula Management Unit](#), including all watersheds within the Olympic Peninsula and the nearshore marine waters of the Pacific Ocean, Strait of Juan de Fuca, and Hood Canal.
