

Introduction to the Simple Reference Profile

Provides an overview of the simple Reference profile in ServCat.

Simple Profile

The best way to understand a Reference is to look at the simple profile view.

Unpublished Report - (Code: 54126)

Title Species status assessment report New Mexico meadow jumping mouse (*Zapus hudsonius luteus*)

Description The New Mexico meadow jumping mouse (*Zapus hudsonius luteus*) (jumping mouse) lives in dense riparian herbaceous vegetation along streams from southern Colorado to central New Mexico and eastern Arizona. It is a subspecies that has been of conservation concern since it was made a candidate for listing by the U. S. Fish and Wildlife Service (Service) under the Endangered Species Act of 1973, as amended (Act) in 2007 (72 FR 69033, December 6, 2007). On June 20, 2013, the Service proposed the jumping mouse as endangered after reviewing its status under the Act (78 FR 37163). This New Mexico meadow jumping mouse Species Status Assessment Report (SSA Report) is a summary of the information assembled and reviewed by the Service and incorporates the best scientific and commercial data available. This SSA Report documents the results of the comprehensive status review for the New Mexico meadow jumping mouse.

The simple profile is intended to show the most pertinent information to help any user determine the value of the information resource to the user's needs.

The upper left indicates this is an Unpublished Report with a reference code of 54126.¹

Below 'Unpublished Report' in the upper left are the metadata elements intended to quickly inform a user about the information resource:

- **Title** - The title of the Reference and, ideally, the title of the information resource too (e.g., title of the actual published report attached as a document).
- **Description** - A brief description of the information resource. In some cases, this may be the associated abstract or overview copied from the document.
- **Full Citation** - This is an auto-generated field that concatenates the authors, dates, title, and other important attributes.
- **Visibility** - Indicates who has permission to view this reference
 - **Public** - Full public access to view the reference profile
 - **Internal** - Only FWS staff may view this reference.

¹ As a reminder, the reference code is the unique identifier for this reference.

Files and Links Panel

The Files and Links panel appears with almost all References and provides access the information resource.

Note the following:

- The files and links presented here are no different than the files and links that were accessible from the search results.
- You may not have permission to download some files containing sensitive and/or proprietary information.

Additional Panels

Below the Files and Links panel there may be additional panels to show related References in ServCat. In all cases, the number refers to the count of related References - panels, however, do not show if the Reference count is zero or the relationship does not apply.

Depending on the specific Reference, one or more of the following panels may show:

- **Related [child References]** - Some References, including those for published report series, books and conference proceedings, can function as containers and organize one or more 'child' References: published reports, book chapters, conference proceeding papers, respectively.
- **Products Created By This Project** - If the Reference describes a Project which created one or more Products that are each described separately as unique References, this panel will list them all.
- **Originating Project and Related Products** - If this Reference was created by a Project with its own Reference, this panel leads you back to the Project plus all related Products.
- **Version History** - Some records are periodically updated with newer finalized versions. This panel presents the entire lineage from the oldest (at the bottom) up to the most current (at the top).
- **See Also** - A Reference may provide links, or cross-references, to other References.
