MEMORANDUM OF AGREEMENT
AMONG THE BUREAU OF RECLAMATION, DEPARTMENT OF THE NAVY, AND
THE U.S. FISH AND WILDLIFE SERVICE
FOR THE USE OF NEWLANDS RECLAMATION PROJECT FACILITIES TO
DELIVER TREATED EFFLUENT TO
STILLWATER NATIONAL WILDLIFE REFUGE

I. Introduction

The United States Bureau of Reclamation (Reclamation), the Department of the Navy (Navy), and the U. S. Fish and Wildlife Service (Service) have entered into an Agreement to use the Newlands Reclamation Project (Project) to deliver treated effluent to Stillwater National Wildlife Refuge (Refuge). The Navy has historically released treated effluent from Naval Air Station Fallon, Nevada (NAS Fallon) into Project facilities.

II. Purpose

This Agreement defines the relationship and duties of the agencies in the release, conveyance and use of treated effluent from NAS Fallon to the Refuge.

III. Authorities

Section 206 (a) of the Truckee-Carson-Pyramid Lake Water Rights Settlement Act of 1990 (Act) (Pub. L. 101-618, 104 Statute 3294) authorizes the Secretary of the Interior (Secretary) to acquire water and water rights sufficient to sustain 25,000 acres of primary wetlands on a long-term basis within the Lahontan Valley, an area that includes the Refuge. Section 206 (a)(3)(A) of the Act authorizes the Secretary to use federal water facilities to deliver water to the wetlands on a non-reimbursable basis. This agreement is consistent with Reclamation’s policy guidance regarding Requests to Authorize Non-Agricultural Discharges into Reclamation Facilities - Requirements related to Clean Water Act Compliance (D&S ENV06-01). The Navy’s release of treated effluent is currently permitted by the Nevada Division of Environmental (NDEP) Protection Permit No. NV0110001 (June 22, 2007).
IV. Agency Responsibilities

a. Responsibilities of the Service:

1. The Service will divert treated effluent at the current point of release from NAS Fallon's Wastewater Treatment Plant within the SW ¼ of the SE ¼ of Section 23, Township 18 North, Range 29 East, MDBM, and convey it through an existing ditch (formerly the E4X Drain) to the Lower Deep Diagonal Drain, then downstream through existing Project facilities to the Refuge. See Figures 1 and 2, attached hereto and made a part hereof.

2. The Service will assist the Navy in obtaining a permit from the Nevada State Engineer to appropriate its treated effluent for NAS Fallon. The Service will seek a secondary permit from the Nevada State Engineer to appropriate treated effluent at the current point of release from NAS Fallon's Wastewater Treatment Plant and convey it through the Project to the Refuge.

3. The Service shall coordinate and measure deliveries of the treated effluent from NAS Fallon to the Refuge with the Truckee-Carson Irrigation District to avoid any adverse effects to Project operations or efficiency.

b. Responsibilities of the Navy:

1. The Navy shall, with respect to effluent discharges from NAS Fallon, remain solely responsible for compliance with all applicable federal and state water quality laws, regulations and requirements, including the Clean Water Act, as amended (33 USC 1251, et. seq), and applicable provisions of Chapter 445A of the Nevada Revised Statutes and standards and conditions set forth in current and future NDEP permits pertaining to such discharges.

2. The Navy acknowledges that there are local, regional and national Reclamation rules, regulations and policies which apply to releases of effluent into a federal Project. This Agreement does not suspend or modify those rules, regulations and policies; however, this Agreement recognizes that the special authority provided under the Act to use Project facilities to convey water to wetlands authorizes the conveyance of treated effluent from NAS Fallon to the Refuge. Should the Navy propose or attempt any other use of Project facilities for conveyance of its treated effluent, then this Agreement shall not apply and the Navy shall be subject to all of Reclamation's rules, regulations and policies which may be applicable to non-wetlands use or conveyance.

c. Responsibilities shared by Reclamation, the Navy and the Service:

1. Reclamation, Navy and the Service shall have the right to make determinations necessary to administer this Agreement that are consistent with the provisions of this Agreement, applicable laws of the United States and of Nevada, and applicable rules and regulations promulgated by the Secretary and the Secretary of the Navy. Each party shall make such determinations in consultation with the other parties to the extent reasonably practicable.
2. Reclamation, Navy and the Service recognize that delivery of treated effluent pursuant to this Agreement is subject to applicable federal Reclamation law, as may be amended and supplemented, and applicable rules and regulations promulgated by the Secretary under Reclamation law.

V. Implementation, Amendment and Termination

a. This Agreement will become effective on the date of the last signature, and may be subsequently amended through written Agreement of all signatories.

b. Nothing in this Agreement may be construed to require the signatories to obligate to pay funds or in any way take action in violation of the Anti-Deficiency Act (31 USC 1441).

c. Nothing in this Agreement or the secondary permit to the Service will require the Navy to continue delivering treated effluent at the current point, or limit the Navy’s ability to seek other secondary permits to use its treated effluent for other purposes at other places.

d. Treated effluent released from NAS Fallon into Project facilities shall not be considered project diversions under the Project’s Operating Criteria and Procedures (OCAP) (43 CFR Part 418). The delivery of treated effluent from NAS Fallon to the Refuge shall not be considered as a Project delivery for OCAP purposes.

e. This Agreement shall remain in effect for a period of 25 years beginning as of the effective date. This Agreement may be renewed for successive periods of 25 years.

...
IN WITNESS WHEREOF, Reclamation, Navy and the Service have executed this Agreement.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This secondary permit is issued subject to the terms and conditions under Permit 79614. The granting of this secondary permit is not intended in any way to waive or affect authority or requirements of water quality control agencies or regulations. This permit is further issued subject to the provisions of NRS 533.440 and the State retains the right to regulate the use of the water herein granted at any and all times. This secondary permit is issued subject to existing rights. A totalizing meter must be installed in the discharge pipeline near the point of diversion and accurate measurements must be kept of effluent diverted to beneficial use. The meter must be installed prior to the filing of the Proof of Completion and before any use of effluent begins.

This secondary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this secondary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)
The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.16 cubic feet per second or 840 acre-feet annually.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:  
Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:  
Map in support of proof of beneficial use shall be filed on or before: 

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 18th day of November, A.D. 2010

APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC
WATERS OF THE STATE OF NEVADA

Date of Filing in State Engineer's Office  FEB 19 2010
Returned to applicant for correction  MAR 05 2010
Corrected Application filed  MAR 23 2010
Map filed  MAR 23 2010 under 79614

The applicant United States of America, Fish and Wildlife Service
1000 Auction Road of Fallon
NV 89406 hereby make(s) application for permission to appropriate the
public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of
incorporation; if a copartnership or association, give names of members.)

1. The source of the proposed appropriation is Effluent from NAS Fallon's wastewater treatment plant.
2. The amount of water applied for is 1.16 CFS
   (a) If stored in a reservoir give the number of acre-feet
3. The water is to be used for maintenance of wetlands for recreation and wildlife/storage.
4. If use is for:
   (a) Irrigation, state number of acres to be irrigated
   (b) Stockwater, state number and kind of animals
   (c) Other use (describe fully in No. 12)
   (d) Power:
      (1) Horsepower developed
      (2) Point of return of water to stream
5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a fixed section corner. If on unsurveyed land, it should be so stated.)

SW 1/4 SW 1/4 Section 23, T. 18N., R. 29E., M.D.B. & M., or at a point from which the SE corner of said Section 23

from SW 1/4 SW 1/4, a distance of 7,890.00 feet.

SW 1/4 SE 1/4 of Section 23, T. 18N., R. 29E., M.D.B. & M., or at a point from which the SE corner of Section 26, T. 18N., R. 29E., M.D.B. & M., bears S. 21°56'20"E. a distance of 6,980 feet.

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

All federally owned or controlled lands within the approved boundary of the Stillwater National Wildlife Refuge as described in Exhibit "A". Refer to maps filed under Permit 62200: 63652

7. Use will begin about January 1 and end about December 31 of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (state manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, diked well with a pump and motor, etc.)

Effluent will be conveyed from the existing NAS Fallon waste water treatment plant through the former E4X Drain, thence via the Lower Diagonal Drain to Stillwater NWR. All necessary works are already completed.

9. Estimated cost of works: N/A

10. Estimated time required to construct works: N/A

11. Estimated time required to complete the application of water to beneficial use: ten (10) years

12. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use.

This secondary application to appropriate effluent from NAS Fallon's wastewater treatment plant is made pursuant to the attached Memorandum of Agreement between the Department of the Navy, U.S. Bureau of Reclamation and U.S. Fish and Wildlife Service. Treated effluent will be discharged to a ditch thence into the Lower Diagonal Drain under a permit issued by the Nevada Department of Environmental Protection (Permit NV0110001). The proposed point of diversion is the point at which this effluent is discharged.

Re: Permit 79614S01 Certificate 19977

Gentlemen:

Please find enclosed Certificate 19977 issued under the provisions of NRS § 533.425. Please be advised that compliance with all permit terms is still required.

Please be advised that the permittee is responsible for notifying the State Engineer’s Office of any address change. Furthermore, when multiple addresses are used by the applicant or agent, the required legal notices will be sent to the latest address of record and not to earlier addresses unless proper written notification from the applicant or agent directs otherwise.

Sincerely,

Jason King, P.E.
State Engineer

STATE OF NEVADA

CERTIFICATE OF APPROPRIATION OF WATER

Under the provisions of NRS 533.425, the State Engineer has determined:

The point of diversion of water from the source is as follows:

SW\4 SE\4 Section 23, T.18N., R.29E., M.D.B.&M., or at a point from which the SE corner of Section 26, T.18N., R.29E., M.D.B.&M., bears S. 21°56'20" E., a distance of 6,980 feet situated in Churchill County, State of Nevada.

Owner of Record: United States of America, Fish and Wildlife Service

Source: Treated Effluent

Manner of use: Recreation

Amount of appropriation: 0.567 c.f.s. but not to exceed 237.92 acre-feet annually

Period of use: January 1st through December 31st of each year

Date of priority: February 19, 2010

Description of works of diversion and manner and place of use:

Treated effluent is discharged from the Fallon NAS sewer treatment plant into the Lower Diagonal Drain and flows into the Stillwater Reservoir, located within the Stillwater National Wildlife Refuge and Management Area, for maintenance of wetlands, recreation and wildlife/storage located within the following:

Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 27, 28, 29, 30, 31, 32, 33 and 34, T.21N., R.32E., M.D.B.&M.

All of Sections 1 through 36, T.21N., R.31E., M.D.B.&M.

Sections 3, 4, 5, 6, 7, 8, 9, 10, 16, 17, 18, 19, 20, 21, 29 and 30, T.20N., R.32E., M.D.B.&M.

All of Sections 1 through 36, T.20N., R.31E., M.D.B.&M.

Sections 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 27, 28, 29, 30, 31, 32 and 33, T.19N., R.31E., M.D.B.&M.
Permit No. 79614S-1

Certificate No. 19977

NE1/4 NE1/4, SE1/4 NE1/4, NE1/4 SE1/4 and SE1/4 SE1/4 Section 13, T.19N., R.30E., M.D.B.&M., lying east of Stillwater Slough.

NE1/4 NE1/4, NW1/4 NE1/4, NE1/4 NW1/4, SE1/4 NW1/4 and SW1/4 NE1/4 Section 24, T.19N., R.30E., M.D.B.&M.

This certificate is issued subject to the terms of the permit and specifically subject to the following term:

This certificate is issued subject to the availability of effluent by the provider and terminates when that availability ceases and is further subject to the terms stated in the Memorandum of Agreement among the Bureau of Reclamation, Department of the Navy, and the U.S. Fish and Wildlife Service.

The right to water hereby determined is limited to the amount which can be beneficially used, not to exceed the amount above specified, and the use is restricted to the place and for the purpose as set forth herein.

IN TESTIMONY WHEREOF, I, JASON KING, P.E., State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 17th day of February, 2016.

State Engineer
