

WATERFOWL SURVEY

SITE: Wilna DATE: 12/10/99

OBSERVER: Alan Bennett TIME: 0840

TEMP: ~55°F (0715: temp was 50°F in Tappahannock)

WEATHER: heavy cloud cover CL COVER: 100%
wind SW ~10 mph

0840

SPECIES	PAIRS	PAIRS + 1	LONE MALES	2 MALES	3 MALES	4 MALES	LONE FEMALE *	FLOCK > 5
Canada geese								950

Field #
8 (northeast)
then flew to
the river
8 (northeast)

0840

NOTES: Large flock of Canada geese flushed immediately upon sighting them, followed flock to the river, and counted numbers through spotting scope. Estimate size of flock at 950 geese. NO collars seen. Geese landed ~200yds off shore.

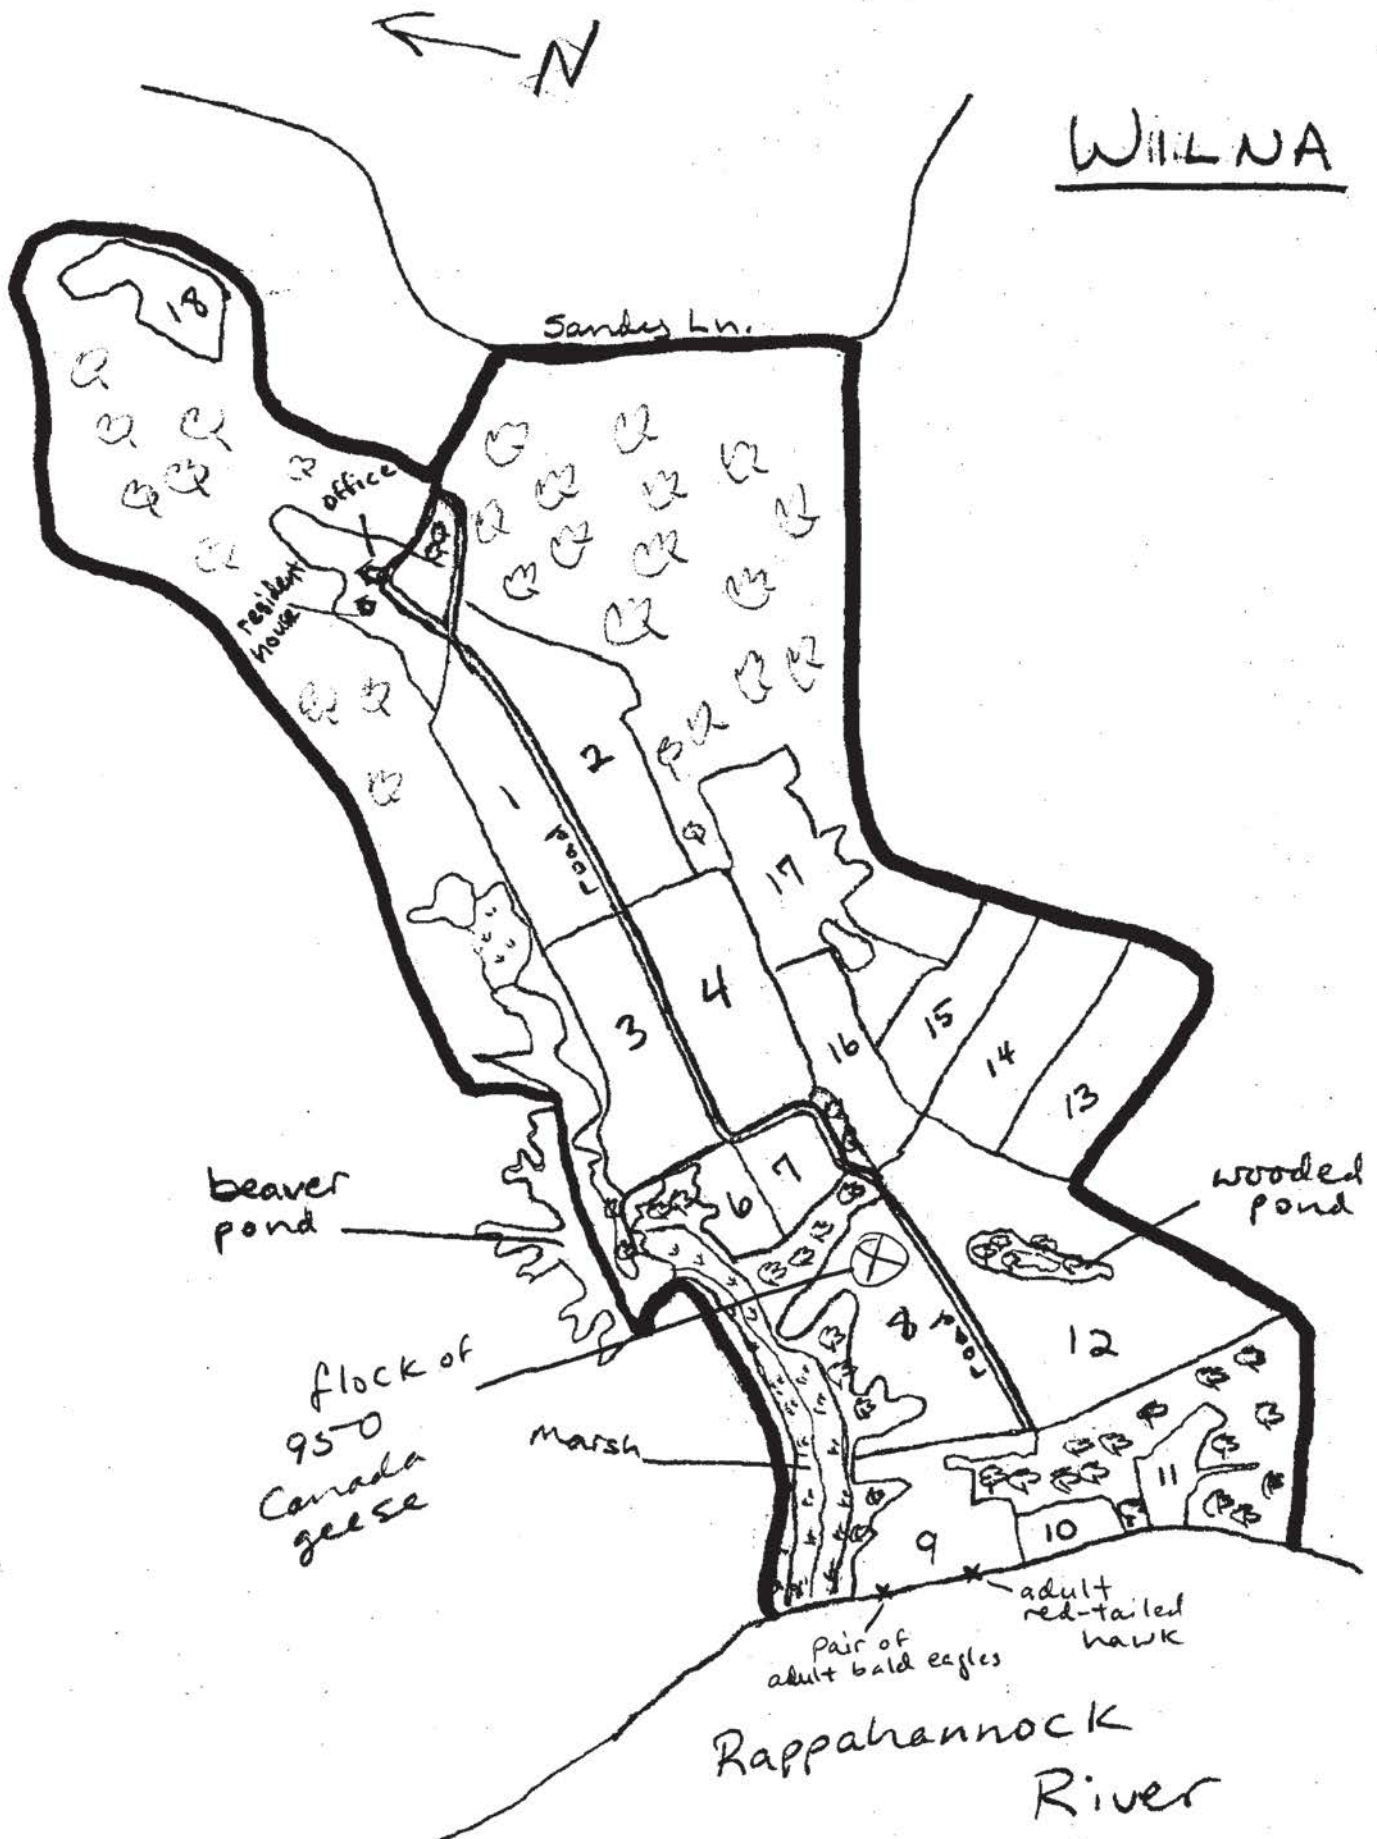

0920: second flock of Canada geese in same part of Field #8 as those earlier (117 geese) but not counted as field previously surveyed.

RAPTORS:

Field #9 - 1 pair bald eagles (adult)
(in trees along river bank) 1 lone red-tailed hawk (adult)

a Indicate if hen is with a brood. Note brood number and class size.

12/10/99

WATERFOWL SURVEY

SITE: Mothershead DATE: 12/10/99

OBSERVER: Alan Bennett TIME: 1005 TEMP: 55°F

WEATHER: Wind SW $\approx$ 5 mph CL COVER: 100%

Weather note: 1145 hrs rain falling, light fog, temp cooler, $\approx 50^{\circ}\text{F}$

[illegible]

NOTES: 1010 hrs: flock of mallards (5 pair + 1 male) in beaver pond in Field #1
1020 hrs: flushed 2 pair of mallards from Clark Trader's marsh/pond
1115 hrs: counted 400 Canada geese in river approx. 250 yds offshore from Mothershead tract.

RAPTORS: red-tailed hawk in large oak near 2nd rain gauge in Field #1

WATERFOWL SURVEY

SITE: Mothers head DATE: 12/15/99

OBSERVER: Alan + Kathy TIME: 7:10am TEMP: 42°F

flocks of
mallards
returning
(R)

estimate
only
(see back
of page)

NOTES: * counted 18 mallards (11 ♂
7 ♀) in semi-open area of the
marsh, but could also partially see others in the taller
grass, but not enough to determine clearly male and females.

** Counted 44 Canada geese before the flock flushed.
Estimated the flock size at 50-60 total.

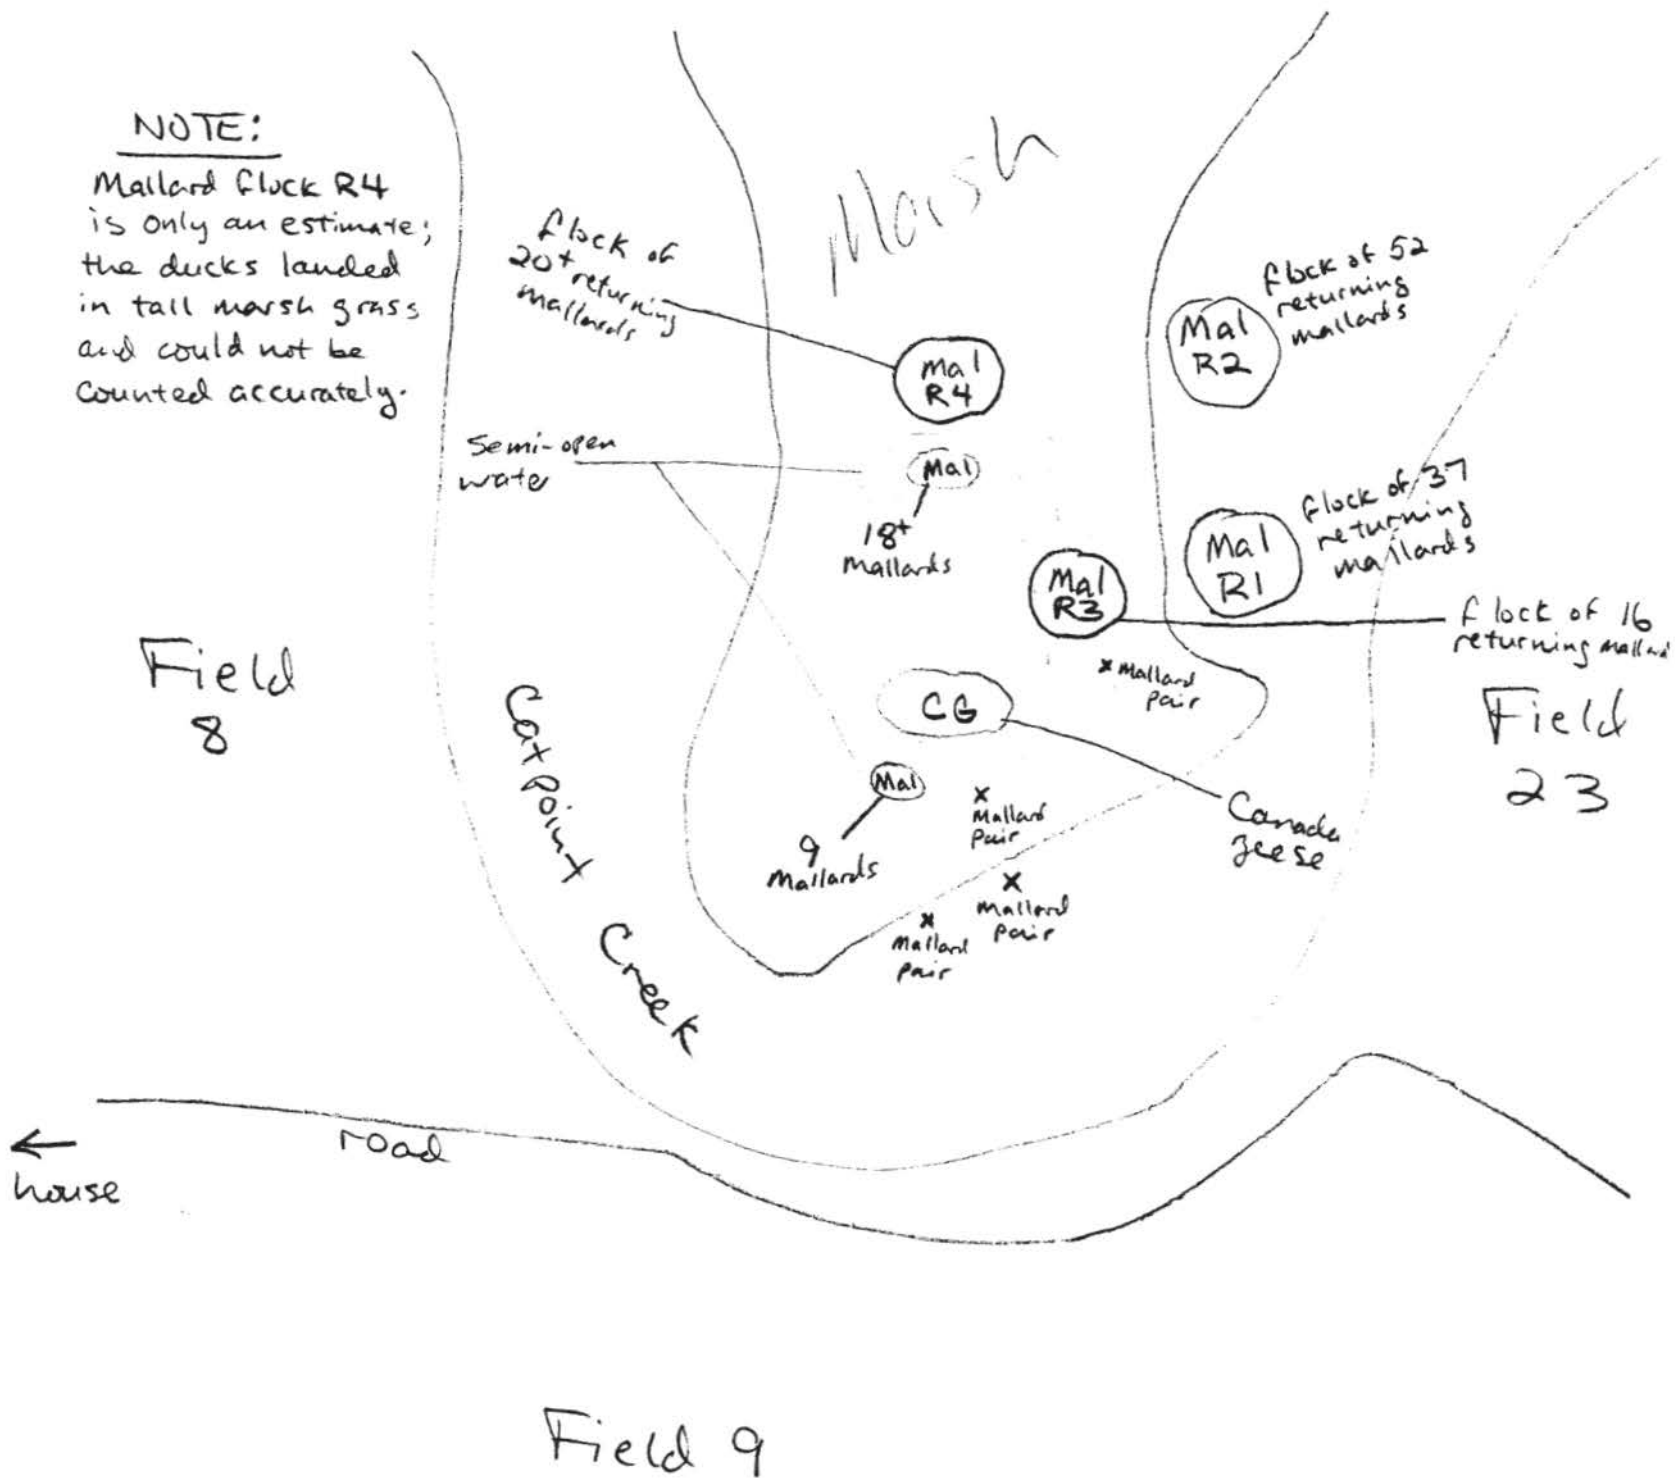

NOTE: When the geese flushed, the 18 mallard flock also flushed,
was able to count 32 mallards in this flock before the flew
out of sight to the west.

a Indicate if hen is with a brood. Note brood number and class size.

SEE MAP DRAWING ON BACK

NOTE:

Mallard flock R4
is only an estimate;
the ducks landed
in tall marsh grass
and could not be
counted accurately.
