

July 30, 1938

Mr. Cochran:

If you have any birds which are not included in this list just add them to the list. There<sup>are</sup> some of the common ones missing as I have not seen them. Not sure about the two with a(?) behind them. A much better list could be obtained from the refuge if I had been working near some wooded areas. Many of the birds that are missing from the list would be found in places like them East River Valley.

I hope this list is in the form you wanted.

*Duncan*
