

# Log In with a Servcat Partner Access Account

---

Once a Partner Access account has been created and activated, the account can be used to access Servcat. To log in with a Partner Access account, navigate to **ServCat** (<https://ecos.fws.gov/ServCat/>). If you are not on a FWS network, you will automatically be redirected to the **Partner Access to ServCat** page. Enter the username and password for the Partner Access account and click **Sign In**. Three failed attempts will result in the account being temporarily locked.

The screenshot shows a web browser window with a navigation bar at the top containing 'Home', 'Help', and 'Contact Us'. The main heading is 'User Name / Password Sign In'. Below the heading is a paragraph of text: 'The login below is intended for individuals who have an active partnership with the USFWS and need to contribute content to ServCat. Please note that Three failed attempts to login will result in a temporary lockout of your account. New users must use the link below to register for an account.' Below this text is a form with the instruction 'Enter your user name and password.' The form contains two input fields: 'User Name\*' with the text 'Parrothead' and 'Password\*' with masked characters. A blue 'Sign In' button is positioned to the right of the password field. Below the form are three links: 'Click here to create a new account.', 'Click here if you have forgotten your password.', and 'Click here if you have forgotten your username.'

After successfully logging in with Partner Access credentials, the page will redirect to ServCat. The partner will remain logged in as long as the web browser session is open. Closing the web browser will automatically log the partner off.
